Skills

Programming Languages: C, Java, Python, JavaScript.
Libraries/Frameworks: Spring, SpringBoot, React, Django, Angular.
Tools / Platforms: Maven, Gradle, Ant, Linux, Android, Mongo
Databases: DB, MySQL, SQLite, PostgreSQL.

Projects

Notes - Android | Github

HTML, CSS, PHP, JavaScript

The Notes application is designed for android to enable users to keep up with the daily day-to-day tasks.
The application is designed using Java and employs the Firestore for data storing.

Exam Portal | Github

Java, Spring, Angular, MySQL

Developed a comprehensive Exam Portal Application using Java Spring Boot for the backend and Angular.js for the frontend. The application facilitates the management of exams, questions, users, and results in a seamless and user-friendly manner.

Student Sync | Github

Python, Django, HTML, CSS, SQLite

StudentSync is an academic-focused communication platform built using Python Django and SQLite. This application aims to streamline communication and collaboration among students and educators in an academic setting. Whether it's sharing resources, discussing assignments, or coordinating group projects, StudentSync provides a centralized hub for academic interactions.
